Le tableau ci-dessous récapitule, pour chaque compositeur de petits motets, les titres reconstitués de ses pièces.

Le classement adopté est celui qui a régi la numérotation du *corpus* : les pièces sont classées pour chaque auteur, par ordre alphabétique des *incipit* et, le cas échéant, par année de publication et/ ou ordre d'apparition dans le recueil. Une exception a cependant été faite au classement alphabétique lorsqu'une même musique peut servir de support à deux textes différents : tel est le cas, par exemple, du PM.716 de Rauch qui peut être chanté sur les paroles *O quam pulcher es* ou *Tota pulchra es amica mea... beata*. Considérant que la musique est l'entité de base, un seul numéro a été attribué ; les deux versions sont distinguées au moyen d'une lettre. Ainsi, le motet *O quam pulcher* porte-t-il le numéro PM.716. a et *Tota pulchra es amica mea... beata* le numéro PM.716. b, bien qu'alphabétiquement il ne se classe pas immédiatement après le précédent.

Les leçons de ténèbres et les litanies ont été classées à la fin du catalogue : elles apparaissent ici à la fin de la production de chaque compositeur.
